

Tundra[®] wins silver at the DIY, Garden & Housewares Industry Awards 2009.

First Alert picked up a silver award for the Tundra fire extinguishing spray in the “Security & Safety” category.

In a highly competitive category this year, Tundra fire extinguishing spray was praised highly for its uniqueness and functionality.

The familiar style spray can with **aerosol nozzle** makes Tundra extremely easy to use and eliminates any confusion over pulling pins or reading instructions before hand - **Just simply point and spray!**

The aerosol nozzle also allows the agent inside to cover a larger surface area-up to three times¹ greater than a traditional extinguisher nozzle. The discharge time of the agent is also up to four times² greater than traditional household fire extinguishers giving users more time to fight the fire.

Tundra's discrete, compact design ensures it will fit into any drawer or cupboard ready to use. Ideal for use in the kitchen as well as on small general fires all around the home.

First Alert is committed to finding new ways to reduce injuries and deaths caused by fires and carbon monoxide poisoning by improving the range of fire safety tools available to consumers in the home.

About First Alert[®]

First Alert[®] is the world's largest manufacturer of Smoke Alarms and Carbon Monoxide Alarms with manufacturing and distribution centres spread strategically across the world and distribution to over 30 countries. Inventors of the first domestic smoke alarm in 1967.

For more information on any of the products in the **First Alert[®]** range please contact Dan Bacon dbacon@firstalert.co.uk or visit www.firstalert.eu

¹

Three times greater wider surface area; typical actuator—14 in² vs. the Tundra™ actuator—48 in²

²

Four times greater than 2-B:C or 5-B:C kitchen fire extinguisher;
minimum of approximately 32 seconds vs. approximately eight seconds
